

TUF-CHOCKS[®] by

DLM

Durable, flexible wheel chocks with tremendous holding power

TC-10L (black laminated) TC-10B (black molded) and TC-10Y (yellow molded). All to help you comply with OSHA regs: "Wheel chocks shall be placed under rear wheels to prevent trucks from rolling while they are boarded with powered industrial trucks."

TRIANGULAR DESIGNS
PROVIDE ADDED HOLDING
POWER. WILL NOT DAMAGE
TIRES OR PAVEMENT.
OFFERED IN BLACK
LAMINATED, BLACK MOLDED,
AND HI-VIS YELLOW MOLDED.

VALUE-ENGINEERED
DOCK LEVELERS & EQUIPMENT

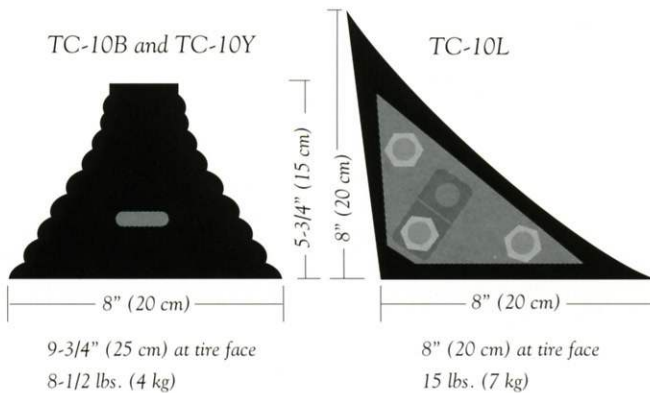

TUF-CHOCKS[®] by

DLM

Superb durability even in the most demanding applications

GREATER HOLDING POWER

DLM Tuf-Chocks feature special triangulated designs that provide superior holding power on virtually any hard surface. With both the molded and laminated models, holding power of the chock actually increases with pressure from the truck or trailer.

BUILT TO LAST

DLM TC-10B and TC-10Y Tuf-Chocks are molded of our exclusive Tuf-Cord[®] material for superb abrasion resistance and durability.

The TC-10L is an extra-heavy-duty model, constructed in layers of fabric-reinforced rubber that are cut from select recycled truck tires, then bound by galvanized steel plates and secured with three full-width galvanized steel bolts.

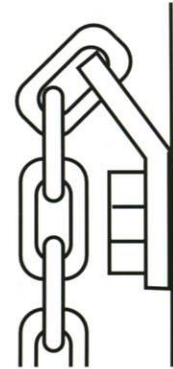

All Tuf-Chock models resist damage, even if they are repeatedly run over by trailers under power. Properly used, only the rubber portion of these chocks comes in contact with the tire or pavement, so the possibility of damage to either is eliminated.

On all models, an integrated ring of galvanized steel is firmly mounted through the wall of the chock, allowing it to be secured to the dock by chain (optional).

OPTIONAL CHAIN/HANGER

The DLM Tuf-Chock chain is a highly recommended option. The 15' (4.6 m) chain is supplied with a device for anchoring the chock to the dock face or wall.

This anchoring device also serves as a convenient hanger for storage of the chock. Merely hook the chock end of the chain over the hanger for ready access to the chock.

WE ARE TOTAL QUALITY

DLM is a total-quality company with an intensive and all-encompassing quality control program. Every aspect of our products – from the raw material to the finishing touches – is closely-monitored to assure that your every expectation for quality and durability is met.

DOCK LEVELERS BY DLM

Edge-of-dock, top-of-dock, and pit-mounted levelers...no matter which type of leveler you need, DLM offers you the best engineering, highest quality, and greatest value. We invented the edge of-dock leveler and the top-of-dock leveler, and have more in service than all other companies combined. We are the number one choice of America's leading freight handling professionals, the motor freight industry. Consult DLM for the dock leveler that's best for your application.
