

# Screen-Pro

- » NEW
- » INNOVATIVE
- » SPECIALLY ENGINEERED

*The ideal alternative to expensive, high-speed, vinyl roll up doors*

*TMI has engineered a cutting edge roll-up door system called the Screen-Pro™. The innovative design allows for modular, interchangeable door panels (Bug Screen, Bird Screen, Solid Vinyl, or Clear) that increase energy savings, create a more comfortable work environment, streamline workflow and improve productivity. These versatile doors can be used all year long to enhance your workplace.*

**Benefits:**

Protects against flying insects, birds, leaves and debris with mesh panels

Improves employee comfort, security and productivity, while creating a barrier to deter theft, trespassing and pilfering

Keeps out the cold, wind, dust, airborne pollutants, street noise with the solid PVC panels (opaque or clear)

*Helps meet FDA and AIB regulations*

**Features**

**Door Speeds:**

The optional In-Tube Motors and external Jackshaft can move as quickly as 12 inches per second.

**Modular Panels**

New design allows for modular, interchangeable door panels (Bug Screen, Bird Screen, Vinyl, or Clear)

**Save-T Breakaway Bars**

Prevents the roll-up screen door from breaking if hit. The bottom bar releases in either direction and can be easily placed back into the track.

**Photo-Eye (Optional)**

Sensor prevents the door from coming down when a person or object breaks the door plane.

**Extruded Aluminum Wind Bars**

The high-strength stiffeners combat high winds and negative pressure.

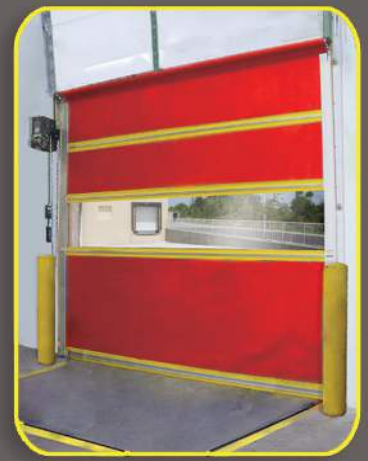

**Extruded Aluminum Guide Tracks:**

Guides the roll-up door with UHMW inserts, which reduce friction and adds an additional layer of protection and security.
